

North American Peruvian Horse Association

**INSTRUCTIONS FOR THE TRANSFER OF A HORSE
FROM THE CANADIAN REGISTRY**

Please Note: This does NOT mean that the horse will no longer be registered with Canada - only that the normally required breeding certificates, stallion reports, etc. will be waived on the presumption that they have been properly filed with the original registry.

1. Complete the top third on the front of the registration application and sign where it says "owner of the mare at the time of foaling" - striking out the "of mare at the time of foaling" part. Please type or print in ink.
2. Complete the markings section on the back of the application. Be sure to do so with the horse in front of you to insure accurate markings for identification.
3. Return to NAPHA with:
 - a) copies of both sides of the Canadian registration papers (also ANCP CPP &/or any other registration papers the horse may have.)
 - b) If the horse was registered in Peru after May of 1982 (see "Fecha de Registro in the lower left corner of the ANCP CPP papers,) the Registry requires documentation that the horse qualifies for a closed stud book. This verification is made via copies of the sire's and dam's ANCP CPP certificates of registration (or grandsire's and granddam's and further back until pedigree shows registration prior to 1982.)
 - c) The required color photographs (at least two - one of each side which show all markings as well as the face of the horse). Please clearly label photos with horse's name. We would prefer that the photographs NOT be Polaroid type unless they are of excellent quality - clearly and accurately showing the color and markings of the horse. If the photos submitted do not clearly and accurately show all four legs from each side and the designated color of the horse, the Registrar will be required to request additional ones. Digital or color copies are not accepted.
 - d) If the horse was registered in the AAOBPPH after September 30, 1999, verification of parentage by DNA is required for transfer UNLESS a stallion report for the sire (which lists the dam with appropriate breeding dates for the foaling date) was properly filed with NAPHA.
 - e) Please see Fee Schedule for transfer fee.

Please note: ALL ungelded males registered or transferred to NAPHA will be registered with a "T" number indicating that they have not yet been registered for breeding purposes. These horses will be subject to NAPHA rules regarding registration of stallions for breeding (those rules require DNA typing by UC Davis, a veterinarian's statement that the horse has two normal, descended testicles and a fee of \$125 which includes the DNA typing costs.)

If you have any questions, please contact the NAPHA office.
